DIV. OF OIL, GAS & MINING

**NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS**

The information requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1987, and the General Rules as promulgated under the Utah Minerals Regulatory Program (R647). The rules and Act are available online at  
and [http://le.utah.gov/~code/TITLE40/40\\_08.htm](http://le.utah.gov/~code/TITLE40/40_08.htm).

Cultural Resources Survey: To fulfill its obligations under Utah Code Annotated 9-8-404, the Division needs cultural resource (archaeology) information. The amount and type of information required will depend on the mine location, the history of previous disturbance, and other factors. Please contact the Division for further information.

A permit fee of \$150 must accompany this application (Utah Code Ann. §40-8-7(1)(i)) and is due annually.

"Small Mining Operations" are operations which have a disturbed area of ten or fewer surface acres at any time in unincorporated areas, or five acres or fewer in incorporated areas.

### III. **OPERATION PLAN** (Rule R647-3-106)

1. **Type of mining:** Surface ( ☒ ) Underground ( ☐ )
2. **Mineral(s) to be mined:** landscape boulders
3. **Amount of material** to be extracted, moved, or proposed to be moved: 1500 Ton
4. Will any **water, liquid chemicals, reagents, or other solutions** be used, produced or discharged as part of the mining or milling process? Yes ( ☐ ) No ( ☒ ) If yes, please describe (add extra pages if needed): \_\_\_\_\_
5. Provide a brief **description of the proposed mining operation**, and onsite processing facilities (add extra pages if necessary). \_\_\_\_\_  
Landscape rock will be mined prior to (and concurrently with) the removal of smaller rock as part of a field improvement project to prepare the field for alfalfa cultivation. Large rock will be removed from the surface or excavated at a maximum anticipated depth of about 4 feet, and will be hauled off-site for immediate use, or to a longer-term storage area by the gate and concrete bunkers for future removal. Smaller rock may be buried on-site.  
It is anticipated that the maximum mining-related disturbances will be at very most 5 acres of the 40-acre field. No more than 1 acre of disturbances associated with the mining of landscape boulders will remain active (unreclaimed) at any one time in order to minimize the reclamation bond. Landscape rock disturbances are anticipated to be either spread apart in various locations or deeper than disturbances associated with smaller rock removal.  
 \_\_\_\_\_  
 \_\_\_\_\_
6. ( N/A ) **New Road(s):** Length \_\_\_\_\_(ft), Width \_\_\_\_\_(ft)
7. ( N/A ) **Improved Road(s):** Describe improvements that need to be made to existing roads to access the site: Length \_\_\_\_\_(ft) and Width \_\_\_\_\_(ft) of new disturbances.
8. Total **mining surface acreage to be disturbed:** 5 acres (acres) (*this will be used to determine surety bond amount – see #VI*).
9. Proposed **startup date** (month, year): November 2014
10. Proposed **completion**, if known (month, year): November 2019

#### **IV. OPERATION AND RECLAMATION PRACTICES** (Rule R647-3-107, 108 & 109)

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover or within practical limits. To accomplish this, the Permittee / Operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining. Please refer to The Practical Guide to Reclamation in Utah, available at::

1. *Keep the mining operation in a safe, clean, and environmentally stable condition.*
2. *Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.*
3. *Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.*
4. *Construct berms, fences, or barriers, when needed, above highwalls and excavations.*
5. *Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.*
6. *Remove all waste or debris from stream channels.*
7. *Dispose of any trash, scrap metal, wood, machinery, and buildings.*
8. *Conduct mining activities so as to minimize erosion and control sediment.*
9. *Reclaim all roads that are not part of a permanent transportation system.*
10. *Stockpile topsoil and suitable overburden prior to mining.*
11. *Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.*
12. *Properly prepare seedbed to a depth of six inches by pocking, ripping, discing, or harrowing. Leave the surface rough.*
13. *Reseed disturbed areas with adaptable species. (The Division recommends a mixture of species of grass, forb, and browse seed, and will provide a specific species list if requested.)*
14. *Plant the seed with a rangeland or farm drill, or broadcast the seed. Fall is the preferred time to seed.*

**V. VARIANCE REQUEST** (Rule R647-3-110)

**Any variance must be approved writing *in advance* by the Division**

Any planned deviations from Rules R647-3-107, Operation Practices, R647-3-108, Hole Plugging Requirements, or R647-3-109, Reclamation Practices, as summarized above (see IV. Operation and Reclamation Practices Item # 1-14), should be identified below listing applicable rule number. Give justification for the variance(s) and alternate methods or measures to be utilized to meet the intent of the rule. Written approval from the Division will be given, if the proposed alternative methods to be used are consistent with the Act.

**Are variances being requested? Yes (    ) No (   X   )**

**VI. SURETY** (Utah Code Ann. §40-8-7(1)[c])

**A reclamation contract and surety must be provided to and approved by the Division prior to commencement of operations. No surface disturbance is authorized until the surety is posted and approved in writing.** The surety may be provided in the form of a certificate of deposit, a letter of credit, a surety bond, or cash. Please contact the Division for further information about submitting the surety. All mining operations are required to furnish and maintain reclamation surety to guarantee that the land affected is reclaimed (Utah Code Ann. §40-8-7(1)[c]).

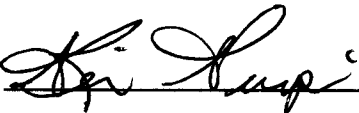

The reclamation surety amount is based on the nature, extent and duration of operations. The amounts are based on data from current large mine surety and are used as a general guide, along with actual site conditions. Reclamation surety for small mines is reviewed every three (3) or five (5) years and adjusted as necessary for inflation/deflation based upon acceptable Costs Index. **Contact the Division for the dollar amount required for a three (3) or five (5) year period for this project.**
